Sister Nivedita Institute   *Kolkata, India*
Secondary School (ICSE)   *Apr 2016 - Apr 2017*
• Passed with Distinction – 80%
• Specialized in Physics, Chemistry, Biology and Math with Computer Science

Experience

• Built and maintained responsive web applications, proficiently handling both frontend (HTML, CSS and JavaScript) and backend (Laravel, Django) technologies.
• Utilized various frontend frameworks like Bootstrap and Tailwind CSS to create consistent and modern UI.
• Designed and developed dynamic e-voting platform, leveraging technologies like Laravel, a PHP framework, and MySQL database for major project at college level.
• Collaborated with team to develop and maintain the codebase using version control tools like Git.

College Project

Online Voting System   *Kolkata*
Techno India Institute of Technology   *Apr 2023 - May 2023*
• Created a fully functional online voting system website using Laravel and MySQL.
• Implemented user authentication and role-based access control to ensure secure and confidential voting.
• Utilized MySQL database for efficient data management and real-time vote tracking.
• Integrated responsive front-end interfaces using Bootstrap to provide a seamless voting experience across devices.
• Successfully deployed the website, enabling users to participate in online voting for various polls and elections.
